

# Making Real Impact (MRI) Building for the Future

Magruder Hospital has received a grant for a new MRI. Our Making Real Impact campaign is dedicated to raising funds to build an addition to the hospital to house this exciting new piece of equipment. Your generosity will help us reach our goal and ensure that every patient has access to the best possible care close to home.

**David West, MD**

President, Riverside Radiology and  
Interventional Associates  
President, Lucid Teleradiology

“The addition of the United uMR680 MRI is a significant advancement for Magruder Hospital and for the patients we serve. Having a modern, high-performance MRI onsite improves diagnostic accuracy, shortens time to diagnosis, and allows patients to receive advanced imaging close to home. From a clinical standpoint, it meaningfully enhances our ability to detect disease earlier and guide appropriate treatment, while improving access and the overall patient experience for our community.”

## Benefits of a NEW MRI machine include:

- Improved imaging capabilities
- Increased exam options
- Decreased time in the MRI
- Faster diagnoses
- More comfortable experience for patients
- Increased capacity for scheduling, which benefits patients and their families

**Tonia Copsey, C-ANP**  
Magruder Hospital Wound Care

“From a nurse practitioner’s perspective, having a more advanced MRI on-site is critical for timely, high-quality care—especially for patients with complex or nonhealing wounds. A state-of-the-art MRI will allow us to more quickly identify serious complications like osteomyelitis, deep infection, or tissue involvement that may not be visible on other imaging, so we can intervene sooner and prevent worsening outcomes. The new MRI will reduce delays, avoids risky transfers to outside facilities, and helps us coordinate care more efficiently, ultimately improving healing, safety, and patient trust.
